

SABAHAT ATTA

FRONT-END | BACK-END | FULL-STACK | AGENTIC AI DEVELOPER

+92 315 5632858 | sabahatatta555@gmail.com | Pakistan | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software engineering professional with verified experience supporting application development and maintenance across the software lifecycle, including coding, debugging, deployment, performance, and cross-functional integration. Brings a broad technical foundation spanning front-end, back-end, databases, mobile development, and programming, supported by ongoing graduate-level study in computer science and AI Agents and Robots Engineering. Positioned to contribute to front-end, back-end, full-stack, and entry-level agentic AI development roles.

TECHNICAL SKILLS

Front-End: HTML, CSS, Bootstrap, JavaScript/TypeScript, React.js, Next.js, web design

Back-End & Databases: PHP, Node.js, API development and integration, database concepts, MySQL, Oracle, Microsoft Access

Programming: Python, Java, C, C++, C#, Visual Basic, MATLAB

Full-Stack & Mobile: End-to-end web application development, front-end/back-end and API integration, application maintenance, Flutter, mobile applications

Development Practices: Coding, debugging, deployment support, performance support, issue resolution, application integration, cross-functional collaboration

Agentic AI Focus: Intelligent agents, agentic systems, robotics engineering, and Python for AI-oriented development (ongoing academic focus)

PROFESSIONAL EXPERIENCE

App Development Department | XingaBots | March 1, 2021 - January 31, 2024

- Contributed to the development and ongoing maintenance of applications in support of operational and business requirements.
- Performed coding, debugging, testing support, and deployment activities across the application lifecycle.
- Helped identify and resolve software issues while supporting application performance, reliability, and availability.
- Collaborated across functions to integrate application components, portals, and related systems.
- Supported application releases and post-deployment maintenance by troubleshooting issues and improving operational continuity.
- Learned and maintained multiple applications in a dynamic technical environment.

SELECTED WEBSITE PORTFOLIO

Wardah Mughal | Ansar Cents | Al Shaheen Graphics | Ahmed.ae

Aqua Alkaline | Pearl Care Foundation | Alsana Opticals | Aman Aluminium

SS Group | Hassan Creates | Khattar Motors | AbuDhabi.com

SELECTED WEB APPLICATIONS

lifeNet - Video Platform | Auralis - Paper Trading | AllinOne - B2B Marketplace

WorkSphere - Company LMS | SelfieTalk - Social Camera

EDUCATION

MS in Computer Science | Allama Iqbal Open University (AIU) | Ongoing | Islamabad

AI Agents and Robots Engineering | Air University | 2024 - | Islamabad, Pakistan

BS in Software Engineering | COMSATS University | 2019 | Wah Cantt, Pakistan

PROJECTS & ACADEMIC WORK

Automatic System for Skin Cancer Detection | Final-Year Project | 2019

- Designed and implemented a software-based skin cancer detection system using MATLAB.

Additional AI and Computer Vision Projects | Project Portfolio | Dates not specified

- Brain Tumor Detection; Skin Condition Detection; Breast Cancer Detection; Human Body Shape and Size Detection.

Traffic Police Website | University Project | 2018 | Wah, Pakistan

- Designed and implemented a traffic police website as an academic web-development project.

Database / Customer Development Project | Academic Project | 2017

- Designed and implemented a database solution using Microsoft Access and Oracle.

Line-Following and Database Project | Academic Project | Date not specified

- Designed a database and implemented a line-following algorithm using C++, C#, and MySQL.

PROGRAMMING ACHIEVEMENT

- Participated in a university Speed Programming Competition (2019); the source CV records a fast-position achievement.
